## THE COMMUNITY

The City of Bremerton offers affordable, quality living in a spectacular water and mountain setting. Located on the Kitsap Peninsula in Washington State, Bremerton lies east of the Olympic mountains and directly across the waters of the Puget Sound from Seattle. The ferry terminal and Bremerton Transportation Center at the foot of downtown lead visitors into a growing community of galleries, theaters, shops, restaurants, museums, and cafes.

Bremerton was platted by William Bremer in 1891 and was officially incorporated on October 15, 1901. With a population of 43,500, the City of Bremerton is the largest city in Kitsap County and serves as the urban center for the Bremerton-Silverdale Metropolitan Area. There is a lot to see and do in Bremerton, like taking a stroll along the boardwalk, touring the historic USS Turner Joy, visiting Harborside Fountain Park and PSNS Memorial Plaza, spending the afternoon browsing through Bremerton's historic Arts District and unique shops, or enjoying golf at the City-owned Gold Mountain Golf Complex which is rated one of the best public golf courses in the country. Bremerton also hosts a variety of annual festivals. The popular Blackberry Festival is held during Labor Day weekend on the waterfront boardwalk to celebrate everything Blackberry with over 130 vendors. In July the boardwalk also hosts 30 microbreweries for the Bremerton Brewfest, and in August a wine festival is hosted by the Bremerton Conference Center in the Harborside Fountain Park. Bremerton is also home to the nation's largest Armed Forces Day parade.

Bremerton is a great place to live and offers quality schools, vast recreation, a clean environment, 35 beautiful parks, cultural programs, convenient shopping, and excellent medical facilities, such as the state-of-the-art Heart & Vascular Center at St. Michael Medical Center in nearby Silverdale. Olympic College in Bremerton provides advanced technical and baccalaureate degrees and enriches the community with many educational and community services and a Business Relations Center. The Bremerton High School complex boasts a modern performing arts center which provides a venue for opera, dance, theater, and the Bremerton Symphony.

For over a century, the City of Bremerton has been home to Naval Base Kitsap-Bremerton and the Puget Sound Naval Shipyard, which employs over 14,000 civilians that service U.S. Navy ships. In addition, nearly 1,000 active duty military personnel, 6,000 Navy-ship based personnel and 2,000 contractors are based at this site. Additional major employers in the region include St. Michael Medical Center in nearby Silverdale and Olympic College. Kitsap County's business climate is healthy and the naval and Department of Defense installations in the county have a significant positive impact on the City's economy. Bremerton's downtown core is undergoing a comprehensive revitalization and the City has developed a master plan for the Puget Sound Industrial Area to encourage manufacturing and industrial development.

## THE CITY

Bremerton is a full-service city that operates under the laws of the State of Washington applicable to a home-rule charter city under a Mayor/Council form of government. The City Council is comprised of seven members, elected by district by the citizens of the City, each serving a four-year term. The Mayor, a full-time elected official, is the chief executive officer of the City. The department directors are appointed by the Mayor with City Council approval, and work under the direction of the Mayor. The management team is comprised of the City's seven department heads who enjoy a collegial and cooperative working relationship. As of 2022, Bremerton operates on a budget of approximately \$225 million including a general fund of \$68 million and employs 395.55 FTEs. The City provides a full range of municipal services including fire protection and emergency medical services, law enforcement, municipal court, parks and recreation facilities and activities, in-house legal department, transportation, infrastructure construction and maintenance, economic development, building and planning, zoning, finance and administration, and operates water, sewer, and storm water utility systems.

## THE DEPARTMENT

The Engineering Project Manager - Transportation works under the general direction of the City Engineer, who leads the engineering division of the City's Public Works and Utilities department. Engineering manages comprehensive planning, design, and construction of City infrastructure; traffic engineering; development project review and permitting; provides engineering services to all City departments; obtains grant and low interest loan funding from Federal and State sources; and assists in regional transportation coordination.

City-wide Engineering personnel and supplies and services costs are allocated and budgeted in one cost center within the General Fund. The \$3.5 million budget for Engineering consists of 24.69 FTEs. Total recoverable charges for services and other work performed by engineering staff for capital projects and utilities operations and maintenance total \$1.8 million.

## THE POSITION

The Engineering Project Manager – Transportation has multiple responsibilities to support Transportation Engineering. Primary duties will include performing project and construction management to ensure the delivery of quality construction of City of Bremerton transportation capital projects. Additional duties may include traffic analysis, transportation planning support, grant application support and traffic operations assessments. Depending on the area of assignment, the project manager may supervise the work of technical staff.

To view a full job description and the full scope of responsibilities, please view the attachment [here](#).

## IDEAL CANDIDATE

### Education and Experience:

- Graduation from an accredited college or university with a bachelor's degree in civil engineering, construction management, or other related field and five (5) years of full-time experience as a licensed Professional Engineer.
- An equivalent combination of education and experience sufficient to provide the applicant with knowledge, skills and ability to successfully perform the essential functions of the job will be considered.
- A valid Washington State driver's license is required and must be obtained prior to date of appointment, or another date set by the City.
- Professional Engineering license in the State of Washington.

### Necessary Knowledge, Skills, and Abilities:

- The ability to exercise a high degree of independent professional judgement in resolving administrative and technical problems within program goals and objectives.
- Experience with transportation planning, capital project delivery, construction management and traffic engineering.
- Knowledge of the principles and practices of transportation planning, civil engineering, and construction standards and methods.
- The ability to analyze challenges, define successful solutions and proactively solve problems.
- Experience planning and managing street improvement projects, or other special projects, providing both administrative and technical oversight of such projects.
